Response to Amendment

1. This Office Action is in response to Amendment filed April 27, 2004.

Claims 1-13 are allowed.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

3. The application has been amended as follows:

The US Application No., cited in the Amendment, was updated as follows:

On page 4, line 11, after "Application No. 09/ 808648", added the expression "now U.S. Patent No. 6,567,891,".

On page 4, line 16, after "Application No. 09/ 808910", added the expression "now U.S. Patent No.6,687,872,".

REASONS FOR ALLOWANCE

4. The following is an examiner's statement of reasons for allowance:

The prior arts of record taken alone or in combination fail to teach, anticipate, suggest or render obvious the claimed invention, as recited in the independent claims blow.

Claim 1 recites a method of performing parity operations in a redundant data storage system including the steps of ***pre-selecting parity coefficient subsets for use***

Art Unit: 2133

in the different parity operations, storing all of the pre-selected parity coefficient subsets in a memory, determining which of the stored subsets of parity coefficients is needed for the particular parity operation, and performing the particular parity operation with the subset of parity coefficients that was read from the memory.

Claim 7 recites a method including the steps of forming groups of the subsets, ***calculating an offset in a linear memory array of a particular group group i corresponding to a subset size L_i in accordance with a predefined function of N and L_i , and reading a subset of values from the particular group at the calculated offset in the linear memory array.***

Claim 10 recites a disk controller that performs parity operations in a redundant data storage system including memory for storing subsets of parity coefficients corresponding respectively to different parity-related computation scenarios, hardware ***parity computation logic configured to any particular parity-related operation by a scenario of the operation, reading the corresponding subset of parity coefficients from the memory, and performing the particular parity-related operation with the subset of parity coefficients read from the memory.***

Consequently, independent claims 1, 7 and 10 are allowed over the prior arts of record. Claims 2-6, 8, 9 and 11-13 are directly or indirectly depended upon independent claims 1, 7 and 10 and therefore are also allowable.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

Art Unit: 2133

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to James C Kerveros whose telephone number is (703) 305-1081. The examiner can normally be reached on 9:00 AM TO 5:00 PM.
